## PROFESSIONAL EXPERIENCE

BLIP (THROUGH AUBAY)

PORTUGAL

**Front End Developer**

**Nov 2023- Actual**

Blip is a software company that develops software for the Flutter group of companies. My role is to develop and maintain systems for Betfair.

- Maintain and create scalable code in a modern system using React.
- Ensured code quality through tests using technologies like Jest, and Storybook.
- Creation of front end documentation inside storybook

KANTAR (THROUGH ALTER SOLUTIONS)

PORTUGAL

**Front End Developer**

**Jan 2023- Oct 2023**

Kantar XTEL is a branch of the renowned Kantar, specializing in system development and modernization. My focus lies in the maintenance and migration of legacy systems.

Our challenge involves transitioning from an older system to a new one gradually, with the ultimate goal of transforming our ecosystem entirely. As a software engineer, I ensure code quality through comprehensive tests, covering all aspects of development.

- Key role in migrating a legacy system, transitioning from SenchaJS to React.
- Ensured code quality through tests using technologies like Jest, and Storybook.
- Creation of front end documentation inside storybook
- Use the Azure ecosystem to work and plan routine and tasks along the team.

DOARE (THROUGH SOFTO)

BRAZIL

**Full Stack Developer**

**Sept 2021- Jan 2023**

Doare focuses on providing a robust platform for charitable giving and social impact, empowering users to contribute to diverse causes. Our main goal is transitioning from outdated infrastructure to a modern and scalable one. I actively contribute to shaping this innovative project, including designing a fresh Front-end architecture with React and leading the creation of an internal administrator panel for partner organizations, enhancing their operational efficiency.

- Made the transition of Doare's platform changing all infrastructure.
- Utilized NestJS for managing the monolithic API and played a leading role in designing the new Front-end architecture with React.

- Technologies: NestJS, React, Angular, Docker, Typescript, NextJS.

## **SUPER DESENVOLVEDORES**

**BRAZIL**

### **Full Stack Developer & Co-Founder**

**Jan 2020- July 2023**

Contributed to the entrepreneurial initiative of Super Developers, focusing on facilitating technology education, addressing financial management challenges, and creating an e-commerce platform for tech enthusiasts. Worked in diverse projects, actively participating in planning, development, and execution.

- Co-founded Super Developers, focusing on technology education, financial management solutions, and an e-commerce platform.
- Worked on various projects using Ruby, Rails, React, Redux, NextJS, and more.
- Transitioned to a streamlined microservices architecture.
- Technologies: Ruby, Rails, Typescript, React, Redux, NextJS, NodeJS, Docker, MongoDB, PostgreSQL, Redis, MySQL.

## **OLX**

**BRAZIL**

### **Apprentice & Intern**

**April 2018- Jan 2020**

In OLX I was engaged in roles from spreadsheet automatization development for the audit team, customization of the help center and overseeing the car catalog. React became my go-to tool for showcasing capabilities through tasks like crafting animated panels for monthly rankings. These experiences deepened my tech understanding and allowed effective contributions to diverse projects.

- Development of spreadsheets and help center customizing.
- Demonstrated proficiency in React through various projects and tasks.
- Creation of animated panels using VanillaJS
- Technologies: Javascript, HTML, CSS, Javascript ,React.
